App in Snap

Role: Front-end Developer

September 2023 – Present

Projects Summary:

- Worked on projects such as Mediko, Car Parking, Car Sharing Web application, and JS Remittance App.

Responsibilities:

- Build and maintain reusable code for future use.
- Collaborate with designers and other developers to translate design mock-ups into functional, user-friendly, and scalable responsive web applications.
- Maintain and improve the website and optimize applications for maximum speed.
- Utilized React Query for API integration.
- Implemented Material UI Prime React for UI in the Mediko project.
- Integrated front-end components with back-end APIs and services
- Ensured that UI works flawlessly on all browsers and devices following responsive design principles.

Qisstpay

Role: Front-end Developer

September 2022 – August 2023

Projects Summary:

- Worked on the Merchant portal, a CMS handling various operations and data records.
- Collaborated on the 1-click checkout and Askari Mall e-commerce website.

Responsibilities:

- Collaborated in an agile development environment.
- Integrated Rest APIs built in Java and Go lang.
- Worked with TypeScript, Redux for state management, and Next.js.

- Implemented UI based on Figma screens using Material UI and Tailwind CSS.
- Created dashboard modules with Apex Chart for data representation.
- Developed Onboarding and various other modules from scratch.
- Built Single-Page Applications (SPAs).
- Bug fixing reported by QA team.

Naxxa Consulting

Role: Front-end Developer

November 2020 – August 2022

Project Summary:

- Worked on the Tely Medy project, an online platform for patient-doctor interactions and an NFT marketplace.

Responsibilities:

- Translated Adobe XD designs into professional and responsive pages using Material UI.
- Utilized GSAP and Framer Motion for animations and worked with GraphQL and RESTful APIs.
- Utilized AWS services such as AppSync, subscriptions, and S3, and worked with Context API.
- Implemented real-time data binding, used Axios for API integration, and employed Redux and Context API for state management.
- Worked with sockets for camera/mic access and connectivity.
- Utilized Formik and Yup for form validation.
